Project Information

Name of project Back up Hard Drive
Amount of grant funding requested \$120.00 (Maximum \$1,500)
Expected date for completion of project December 2011
Who will be responsible for completion of the project? Carol Edson

Description - Brief overview of project plan stating how grant funding will be used:
We have been actively transferring all our slides into digital format. We have purchased hundreds of geology and oceanography images on CD. By having a portable back up hard drive with all these images stored, instructors can use any of them in any classroom. It also ensures our investment; we will have a copy in case of damage to the original CD and DVD images. End of term surveys have shown that students enjoy and benefit from these compelling memorable photographs as a learning tool.

Benefits - Please briefly explain how the project will improve service to the colleges in your area of work responsibility:
Our non-science majors often struggle with transferable science courses. Excellent visual images help most students remember the concepts and apply their knowledge. We have worked hard to amass over 1500 excellent quality geologic and oceanographic images for use in geology lectures and labs. This back up hard drive will add flexibility to the use of these images in more than one classroom at a time, and will provide a safety net in the case of damage to the original files.

I agree to provide a one-paragraph outcome report to CARE at the completion of the project.
