Project Information

Name of project Clear boxes for Display Minerals
Amount of grant funding requested \$400.00 (Maximum \$1,500)
Expected date for completion of project December 2011
Who will be responsible for completion of the project? Carol Edson

Description - Brief overview of project plan stating how grant funding will be used:

These clear mineral display boxes will be used for showcasing donations of unique minerals including epidote, garnet, quartz and tourmaline. To preserve these fragile specimens, and allow hands-on use by students, we need to protect them. These sets of transparent lidded boxes will let us do that without diminishing the students ability to see the characteristics of each sample. See attached photo. We will have enough to supply the department for years as new specimens are acquired as well.

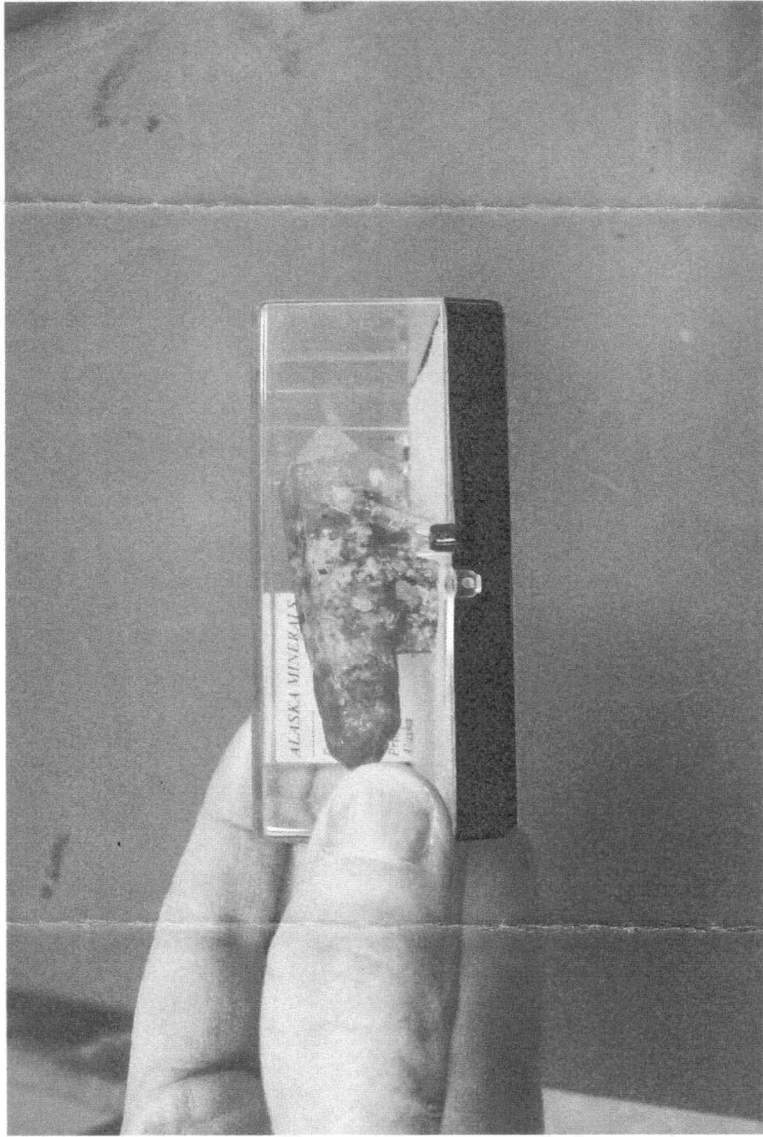

Benefits - Please briefly explain how the project will improve service to the colleges in your area of work responsibility:

Currently these unique specimens must be kept in locked cases or risk being destroyed inadvertently. Eager students underestimate the fragility of some beautiful samples. These clear boxes help prevent damage while making the samples available for students to hold and observe. Teaching science to non-science majors is an on-going challenge. Engaging the reluctant science student can begin with something as simple as holding something they have never seen before. These protective boxes will help us foster these learning experiences.

I agree to provide a one-paragraph outcome report to CARE at the completion of the project.
