

Fermentation Support – David Everett

“The funds received were used in support of the purchase of instructional equipment (temperature control valves), and upgrade of instructional spacethat reflects the modern wine industry, and helps prepare students for the types of technology they will encounter in the industry. I will be forever grateful to CARE for providing these critically needed funds. It is programs like these that really make a difference for our students and inspire us to strive for improvements in all aspects of our lives as teachers and mentors. “
