### Project: Creating Instructional Videos with Camtasia

I would like to express my gratitude to the Chabot-Las Positas Association of Retired Employees for the CARE Fund Special Projects Grant Program. The award was used to purchase the software Camtasia to create instructional videos and screencasts for students in my face-to-face and hybrid English courses at Chabot College. This semester using Camtasia, I have produced videos lectures and screencasts, uploaded them to YouTube, and posted them on Blackboard for my students to view. My students appreciate the videos I have created, noting that they enjoy seeing the captions on the screen and the ability to review the content materials as many times as necessary before a test or assignment. My students could even view my videos on their mobile devices. Those students who were absent the day of a given lesson still have 24/7 access to the videos. As a result, I have engaged them in more interactive, challenging activities in the classroom and have created an even more student-centered learning environment. Overall, Camtasia is an excellent video production tool, and I look forward to creating even more innovative videos in the future. Here are some of the videos I have created using Camtasia:

The screenshot displays the YouTube Creator Studio interface. On the left is a navigation sidebar with options: DASHBOARD, VIDEO MANAGER (highlighted), Videos, Playlists, LIVE STREAMING, COMMUNITY, CHANNEL, ANALYTICS, and CREATE. The main content area shows a list of 13 videos. A user profile dropdown menu is open, showing the name Maritez Apigo, 4 subscribers, and options for Creator Studio, Add account, and Sign out.
