

**HSI Gateway to Success Calculator Loaner Program**  
**Jared Howard, Las Positas College**

Thank you very much for the CARE grant's support to the HSI Gateway to Success Learning Community and the students our program serves!

The HSI Gateway to Success Program has purchased 4 TI-83 Plus Graphing Calculators through the CARE grant and have placed them for semester-long checkout to any student participating in the HSI Gateway to Success Learning Community at Las Positas College. These calculators have been used to support students who have not had available funds to purchase calculator for their math classes. Because the learning community aims to support students seeking STEM-based tracks, the calculators are particularly important to our students (the majority of our students are required to take multiple transfer-level math courses during their time at LPC).

This has also served as a tangible benefit toward recruiting students into the HSI Gateway to Success Program.
