

## Periodic Table for Studying Mary Love, Chabot College

Thank you CARE for the grant for the STEM Center to buy a periodic table. The STEM Center holds tutoring for numerous subjects, including Chemistry. Anyone who has taken Chemistry before knows just how important it is to have a periodic table on hand in order to answer various Chemistry problems. That's why when CARE gave us the grant for the periodic table and we were able to purchase a giant one for the STEM Center, we were all super excited. The periodic table has been a massive help when tutoring our students. You can see it from anywhere in the room and if you don't have one readily available, you can just look over and point at the wall. It also saves precious time for the students because they don't have to go rummaging through their backpacks to find their periodic table or waste time trying to pull one up on their phone. Our Chemistry students really appreciate it and when they walk into the center, they know immediately that we are there to support them.
